## PROFILE

Full-stack developer with a focus on scalable systems and clean code. I transform complex tasks into reliable and efficient solutions. Over 4 years of experience in developing web applications using React, Next.js, and NestJS

## WORK EXPERIENCE

**DMZ Home Construct | Full-Stack SE | 2025**  
(Construction company, residential complex SAMPO)

**Stack:** Payload CMS, Next.js, TypeScript, Tailwind CSS

I developed a headless CMS to manage the website's content. I configured data models, APIs, and access permissions, and integrated the CMS with Next.js. I implemented the functionality to create new pages and news articles directly through the CMS.

**CPABOX | Full-Stack SE | 2022–2025**  
(SaaS platform for traffic arbitrage automation)

**Stack:** React, NestJS, TypeScript, Grammy, Zustand, MUI

Developed and maintained the frontend architecture and backend logic. Developed a Telegram bot for monitoring domains with renewal notifications. Set up API integration with Keitaro and webhooks for data synchronization. Created a Telegram Web App for selecting and adding domains for monitoring.

**Remotza.tech | Backend/Full-Stack Developer | 2021–2022**  
(Custom software development)

**Stack:** Laravel, Vue.js, PostgreSQL, Redis

I created RESTful APIs with the integration of external services. I worked with PostgreSQL and Redis for data management and caching. I participated in the development of the user interface using Vue.js.

**AOPSRM | Full-Stack Developer | 2020–2021**  
(An NGO assisting ostomy patients in Moldova)

**Stack:** React, Laravel, Docker, GitLab CI/CD

I developed and launched a CRM system from scratch. I implemented the frontend in React and the REST API in Laravel. I set up a full CI/CD pipeline for automatic deployment using Docker and GitLab.

## PRINCIPLES AND APPROACHES

- ✓ Clean architecture and reliable processes
- ✓ A product-oriented approach to development
- ✓ Continuous learning and team synergy
- ✓ Every project is a step towards a more sustainable ecosystem

## TECHNICAL SKILLS

**Core stack:** Next.js, React, TypeScript, NestJS

**Infrastructure and Data:** PostgreSQL, Redis, Docker, GitLab CI/CD

**Additional:** Telegram Bots (grammY), Telegram Web Apps
