## About Me

Full-stack developer with 4+ years of experience, specializing in building web applications and Telegram bots. I'm equally confident in both frontend and backend development, focused on creating flexible and scalable solutions.

I care deeply about architectural reliability, user convenience, and automation of routine tasks. Continuously learning, I listen to my teammates and strive to propose solutions that benefit both the business and the team.

---

## Technical Skills

| **Frontend** | React, TypeScript, Next.js, Vue, Zustand, Webpack/Vite, MUI, Styles Components |

| **Backend** | NestJS, TypeScript, Laravel (PHP), REST API, Telegram API, Grammy |

| **Databases** | PostgreSQL, MariaDB, Redis |

| **Infrastructure** | Docker, GitLab CI/CD, Cloudflare, Webhook Architecture, Postman |

| **Other** | Telegram Bots, Telegram Web Apps, Интеграции , ORM |

---

## Work Experience

**Full-Stack Developer | CPABOX** (SaaS platform for media buying automation) |  
**2022–2025**

**Stack:** React, NestJS, PostgreSQL, TypeScript, Grammy

- Developed and maintained the frontend architecture using **React/TypeScript** (Zustand, MUI, Styled Components, Webpack)
- Developed backend logic using **NestJS** with **TypeScript** and **ORM**.
- Implemented **Keitaro TDS** integrations
- Created a Telegram bot for automated domain checks and monitoring
- Built **Telegram Web Apps** and **Webhook- integration** architecture
- Actively contributed to architectural and technical solution discussions

**Key Result:** *A fully functional platform automating routine operations for traffic arbitrage.*

**Personal Result:** *Significantly improved architecture and product-thinking skills; learned to propose balanced solutions aligned with business and team needs.*

---

## **Backend/Full-Stack Developer | Remotza.tech | 2021–2022**

**Stack:** *Laravel, Vue.js, PostgreSQL, Redis*

- Built **RESTful APIs with Laravel (PHP)** for information systems
- Worked with **PostgreSQL** and implemented caching using **Redis**
- Integrated external services and internal modules into the project architecture
- Contributed to UI development using **Vue.js** in tandem with backend APIs

**Key Result:** *Stable APIs aligned with client business requirements*

**Personal Result:** *Learned to value stability, supportability, and flexibility in development stacks; enhanced skills in team communication and maturity.*

---

## **Full-Stack Developer | AOPSRM | 2020–2021**

**Stack:** *React, Laravel, Docker, GitLab CI/CD*

- **Built the project's frontend** using React, React Router, Redux, and Formik

- **Delivered an end-to-end project** from architecture design to production deployment  
Created a full-featured **CRM system** with React frontend and **Laravel (RESTful API)** backend
- Set up infrastructure with **Docker containerization and GitLab CI/CD**
- **Handled server administration and post-launch technical support**

**Key Result:** Independently developed and launched a CRM system

**Personal Result:** Gained deep understanding of the complete development cycle; built strong confidence in delivering real-world products.

---

## Education

**Russian University of Cooperation | Accounting and Finance | 2003–2007**

*Additionally:*

- Gained hands-on experience through practical development
  - Continuous self-education via professional resources
-
